

# CLOPPER ROAD PHASE 1B PROJECT UPDATE

## Project Purpose:

The new water main will enhance service and reliability to customers living in this area – providing a constant supply of safe, clean drinking water.

## What to Expect:

New water mains will be installed which involves constructing a trench in a section of the pavement. Aboveground pipes may be temporarily installed along the roadway edge to maintain the same quality of water service to our customers during this project.

## Project Status:

WSSC Water contractor, Rivers Construction Group, will be replacing approximately 1.1 miles of 24-inch water main along Clopper Rd. (between Liberty Mill Rd. & Great Seneca and Cinnamon Dr. & Waring Station.)

There may be temporary changes to traffic patterns and/or parking restrictions, however residents will still have access to their homes. WSSC Water will provide 48-hour advance notice prior to any parking restrictions. Anticipated work hours are Monday-Friday from 8:00 a.m. – 4:00 p.m. Work may occasionally extend beyond these hours to complete specific tasks.

## Project Start:

Beginning mid-Summer 2024

## Work Remaining:

1.1 miles of 24” diameter water main.
