

# 48-INCH PATUXENT RAW WATER PIPELINE - UPDATE

## Project Purpose:

The new pipeline will enable the Patuxent Water Filtration Plant to increase production to meet the drinking water needs of Montgomery and Prince George's County customers, while ensuring infrastructure resiliency and redundancy.

## Work Remaining:

Approximately 480 linear feet of 48-inch diameter raw water remains to be installed along Bond Mill Road, approximately 700 linear feet of 30-inch diameter & 36-inch diameter raw water remains to be installed north of Patuxent Filtration Plant.

## Project Status:

WSSC Water contractor Allan Myers is installing a 48-inch diameter raw water main along Bond Mill Road approaching the BG&E ROW (power line).

## What to Expect:

Temporary traffic lane closures will continue during the remaining construction activities. Temporary parking restrictions will continue in the affected areas. Permanent road restoration will be performed after the main has been installed, tested and connected to the existing pipe (Oct./ Nov. 2024). Mill and overlay of the asphalt roadway will be performed after the permanent road restoration has been completed (Spring 2025).

## Completed Work:

Allan Myers has installed over 10,400 linear feet of 48-inch diameter raw water main along Brooklyn Bridge Road and Bond Mill Road. An additional 1,800 linear feet of 48-inch raw water main has been installed along the BG&E ROW.
